WALDIS safes

Premium safes from Switzerland

There are some things money can't buy. Those things that aren't just materially valuable – they have huge emotional significance, too. When something is stolen, the insurance money is small comfort. After all, our valuables are associated with memories, stories and parts of the past. In short: irreplaceable values.

I'm a bold and positive person. I go through life with an open mind, I like to try new things, and 'dare to succeed' is my motto. I like to take risks: they're part of life and certain decisions go hand-in-hand with them. But I avoid the unnecessary ones. Many of these unnecessary risks can be found in the area of security. Security: something we all really need and which contributes significantly to our well-being.

When it comes to protecting valuables, maximum security is our core expertise. As a Swiss-made, owner-operated family business, we have specialised in the development and manufacture of safes, safe rooms and armoured doors since 1983. We always combine maximum safety with the finest design. With our long-standing experience and the extensive expertise we have developed over the years, we are proud to call ourselves Switzerland's leading safe manufacturer. This helps our customers around the globe feel safe and secure.

There are all kinds of reasons for choosing a safe. The preferences and demands placed upon it are just as varied. Meeting them is particularly important to us and keeps us coming up with new ideas every day. Maybe yours is next?

We look forward to advising you personally and helping you develop a new sense of security.

Markus Wirth, CEO and Owner

Safety

Security features of WALDIS safes

WALDIS develops all its products by itself. They're certified and boast maximum break-in resistance in their security class. They are considered among the safes most secure against break-ins and certified according to European standard EN 1143-1. Security certificates and regular audits ensure that all WALDIS safes meet the standards of their resistance class. WALDIS is also a member of Swiss Label.

The key security features at a glance:

- Up to 30 years' break-in guarantee
- VdS certification EN 1143-1, resistance level 2, 3, 4, 5, 7
- Virtually gap-free design, 180° door opening angle, hinging DIN right
- High-quality chrome steel inner lining
- Electronic locking systems as standard
- 50 mm to 130 mm wall thickness, 115 mm to 200 mm door thickness

Unique break-in guarantee

WALDIS is the only safe manufacturer to offer a break-in guarantee of up to 30 years. This is how sure we are of the quality and resilience of our Swiss-made products.

Swiss made

Swiss Quality from Rümlang

As a Swiss company based in Rümlang, we make all our safes in our in-house production facilities. Quality and precision matter to us. We take our responsibilities very seriously and do everything we can to produce a highly secure, reliable and durable product that impresses on all levels.

WALDIS aims to produce the most secure storage containers, with superlative workmanship and design. In doing so, we rely on Swiss craftsmanship and quality.

From our in-house locksmith and the paintwork for our safes to final completion, we cover every aspect of production at our premises in Rümlang. Last but not least, logistics and shipping take place here too – in our Swiss-made one-stop shop.

YOUNIQUE safes

Unique masterpieces made in our workshop

Beauty is in the eye of the beholder: a saying that's old, but true. It turns the search for the single most beautiful design of all into an impossible quest. But this isn't a quest for us to pursue, because all that matters to us is one question: what do you like?

This is the only focus of our YOUNIQUE safes. You have the opportunity to create a safe that's flawlessly aligns with your personal tastes. Choose from the finest materials: from luxurious wood and gold-plated surfaces to exquisite accessories – when it comes to interior design, colour and material, there are no limits.

This creates a unique piece that delights you every day with its look and is perfectly designed to meet your needs. The YOUNIQUE safe also does the most important job of all, ensuring you can store your most precious possessions in the most secure conditions. We design and produce safes tailor-made for you at our Rümli workshop.

Fittings and accessories

Tailor your safe to suit your personal needs

Individuality knows no bounds – even when designing a safe. Everybody needs something different from a safe – so we're all about making your specific requirements a reality.

We offer a wide range of safe locks, watch winders, design elements and other accessories to help kit out your safe to suit you. Get inspired and share your dreams for your very own safe with us.

Gilding

Stay golden: swivel handles, panels and locks can be plated in 24-carat gold on request.

LED interior lighting

We bring light into the darkness. The interior of your safe is equipped with side LEDs to always show off your valuables in their best light.

Watch winder

Enhance your WALDIS safe with watch winders to keep your automatic watches moving, so they never stop ticking.

Fittings

The safe's lock and panel can be customised with a powder coating in your desired colour.

Safe base

With a base, it's easy to use your safe at a comfortable height. The base fits all WALDIS safes. The design features internal hinges, and it comes equipped with an electronic combination lock.

Wooden interior fittings

Wooden interior fittings have a very special appeal: they create a sense of warmth and orderliness and, with all kinds of wood available, everyone can find the right option to suit them. We can create endless customisations for you using wood as a material.

Paintwork

Your chosen colour to match your furniture. Your WALDIS safe and base can also be painted using textured or high-gloss paint. Use the RAL or NCS colour menu as a guide. Airbrush technology to create your own preferred design is also available.

Jewellery inserts

Just like a jeweller: a beautiful way to store your favourite jewellery in your safe. Your valuables are presented in an attractive way and easy to access.

Electronic locks

High-security locks for your safe

The safe lock is the mastermind of the safe and its central control unit. Thanks to millions of number combinations and additional features such as automatic lockout periods for incorrect code entry and alarm functions, electronic locks offer the highest level of security compared to mechanical locks.

- Locks are available with a chrome cover or custom colour on request

Different security levels, areas of application and numbers of users require different locks. We would be happy to discuss this with you and share our advice.

Primor 3000

- Electronic motor-driven lock
- 1 user code / 1,000,000 coding options
- Lockout time after three false entries
- Battery mode / easy battery replacement from outside

Sizes and weight

Safe model dimensions

All WALDIS safes are available in various sizes. You'll find an overview of the key measurements in the table on the right.

The following also applies to all safes:

- Hinging DIN right (left on request)
- 4-fold anchoring available on the back wall and floor
- The safe handle measures an additional +62mm in depth

You'll find all our prices and the dimensional drawings as downloadable PDFs on our website, along with further information on the individual models.

Safe model	Outer dimensions H x W x D (mm)	Inner dimensions H x W x D (mm)	Content (L)	Weight (kg)
